

## DPRK to Adjust Uses of Existing Nuclear Facilities

[Korean](#) / [English](#) / [Chinese](#) / [Spanish](#) / [Japanese](#)

Pyongyang, April 2 (KCNA) -- A spokesman for the General Department of Atomic Energy of the DPRK gave the following answer to a question raised by KCNA as regards the new strategic line laid down at the March, 2013 plenary meeting of the Central Committee of the Workers' Party of Korea on simultaneously pushing forward economic construction and the building of nuclear armed force to cope with the prevailing situation so as to meet the law-governing requirements of the development of the Korean revolution:

The field of atomic energy is faced with heavy tasks for making a positive contribution to solving the acute shortage of electricity by developing the self-reliant nuclear power industry and for bolstering up the nuclear armed force both in quality and quantity till the world is denuclearized, pursuant to the strategic line on simultaneously pushing forward economic construction and the building of the nuclear armed force.

The General Department of Atomic Energy of the DRPK decided to adjust and alter the uses of the existing nuclear facilities, to begin with, in accordance with the line.

This will include the measure for readjusting and restarting all the nuclear facilities in Nyongbyon including uranium enrichment plant and SMW graphite moderated reactor which had been mothballed and disabled under an agreement reached at the six-party talks in October, 2007.

This work will be put into practice without delay. -0-

### Tourism

#### Central Zoo

Pyongyang, March 11 (KCNA) -- Citizens of the Democratic People's Republic of Korea, including school youth and children, spend a pleasant time at the Central Zoo in Taesong District, Pyongyang.
