

DPRK Foreign Ministry Spokesman Slams UNSC's Additional "Resolution on Sanctions" against DPRK

Korean / English / Chinese / Spanish / Japanese

Pyongyang, March 9 (KCNA) -- A spokesman for the Foreign Ministry of the DPRK issued the following statement on Saturday:

The UN Security Council on Thursday cooked up another "resolution on sanctions" against the DPRK over its third nuclear test with the U.S. as a main player.

The "resolution" is a clear proof that the UNSC was abused for the implementation of the hostile policy of the U.S. to bring down the ideology and system chosen by the people of the DPRK by disarming and suffocating it economically.

The U.S. wantonly violated a sovereign state's legitimate right to launch a satellite and has escalated the moves to stifle the DPRK. It is, therefore, the arch criminal which compelled the DPRK to conduct an underground nuclear test for self-defence.

Had the UNSC been impartial even a bit, it should have taken issue with the high-handed hostile acts of the U.S. against the DPRK, to begin with, as it pushed the DPRK, which had planned to focus its efforts on economic construction and improvement of people's living standard, to a nuclear test.

However, from the beginning the UNSC has taken a wrong way of creating a vicious cycle of tension, paying heed to the unilateral demand and assertion of the U.S. only in disregard of the root cause of the hostility between the DPRK and the U.S. and the nuclear issue of the Korean Peninsula.

The UNSC has cooked up five "resolutions on sanctions" against the DPRK at the instigation of the U.S. for the last eight years but they only resulted in the DPRK's bolstering of its nuclear deterrent qualitatively and quantitatively quite contrary to what they expected.

The DPRK's nuclear deterrent has provided a firm guarantee for defending the country's sovereignty and vital rights and served as an all-powerful treasured sword for shattering the U.S. moves to ignite a nuclear war and bringing earlier the historic cause of national reunification.

The DPRK, as it did in the past, vehemently denounces and totally rejects the "resolution on sanctions" against the DPRK, a product of the U.S. hostile policy toward it.

The U.S. and its allies' adoption of the base "resolution on sanctions" aimed to bar the DPRK from conquering space and weaken its nuclear deterrent would only result in increasing the capability of Songun Korea a thousand times.

The UNSC committed such crime as encouraging the U.S. in its shameless attempt to unleash a nuclear war under the pretext of "nuclear nonproliferation", creating a touch-and-go situation on the Korean Peninsula.

The DPRK has already clarified its firm stand that it would take stronger countermeasures in succession and lead them to a great war for national reunification in case the U.S. opts for conflict finally.

The DPRK will fight it out and win a final victory without fail by its own efforts and its own way.

The world will clearly see what permanent position the DPRK will reinforce as a nuclear weapons state and satellite launcher as a result of the U.S. attitude of prodding the UNSC into cooking up the "resolution." -0-
